

Ready for future challenges of the next decade

L'ÎLE D'YEU

At the turn of a new energy
we have a strong hand.

Existing structures

Canada pier

(Already built)

Commercial buildings ready to be transformed adequately (Old factory)

Télécommunications

High speed internet for commercial use at good rates

Services

- Medical services;
- Fast «liaisons» for the passengers;
- Regular freight travels;
- Equipment ready for use to lift up to 14 tons;
- Schools;
- Retail stores and restaurants;
- Airport;
- Heliport;
- Well-equipped resort harbor.

Fast to intervene on location: key factor

Due to the fact we are located close the windmills this ideal location allow 24h/24 home access on offshore site therefore an any stage of the tide.

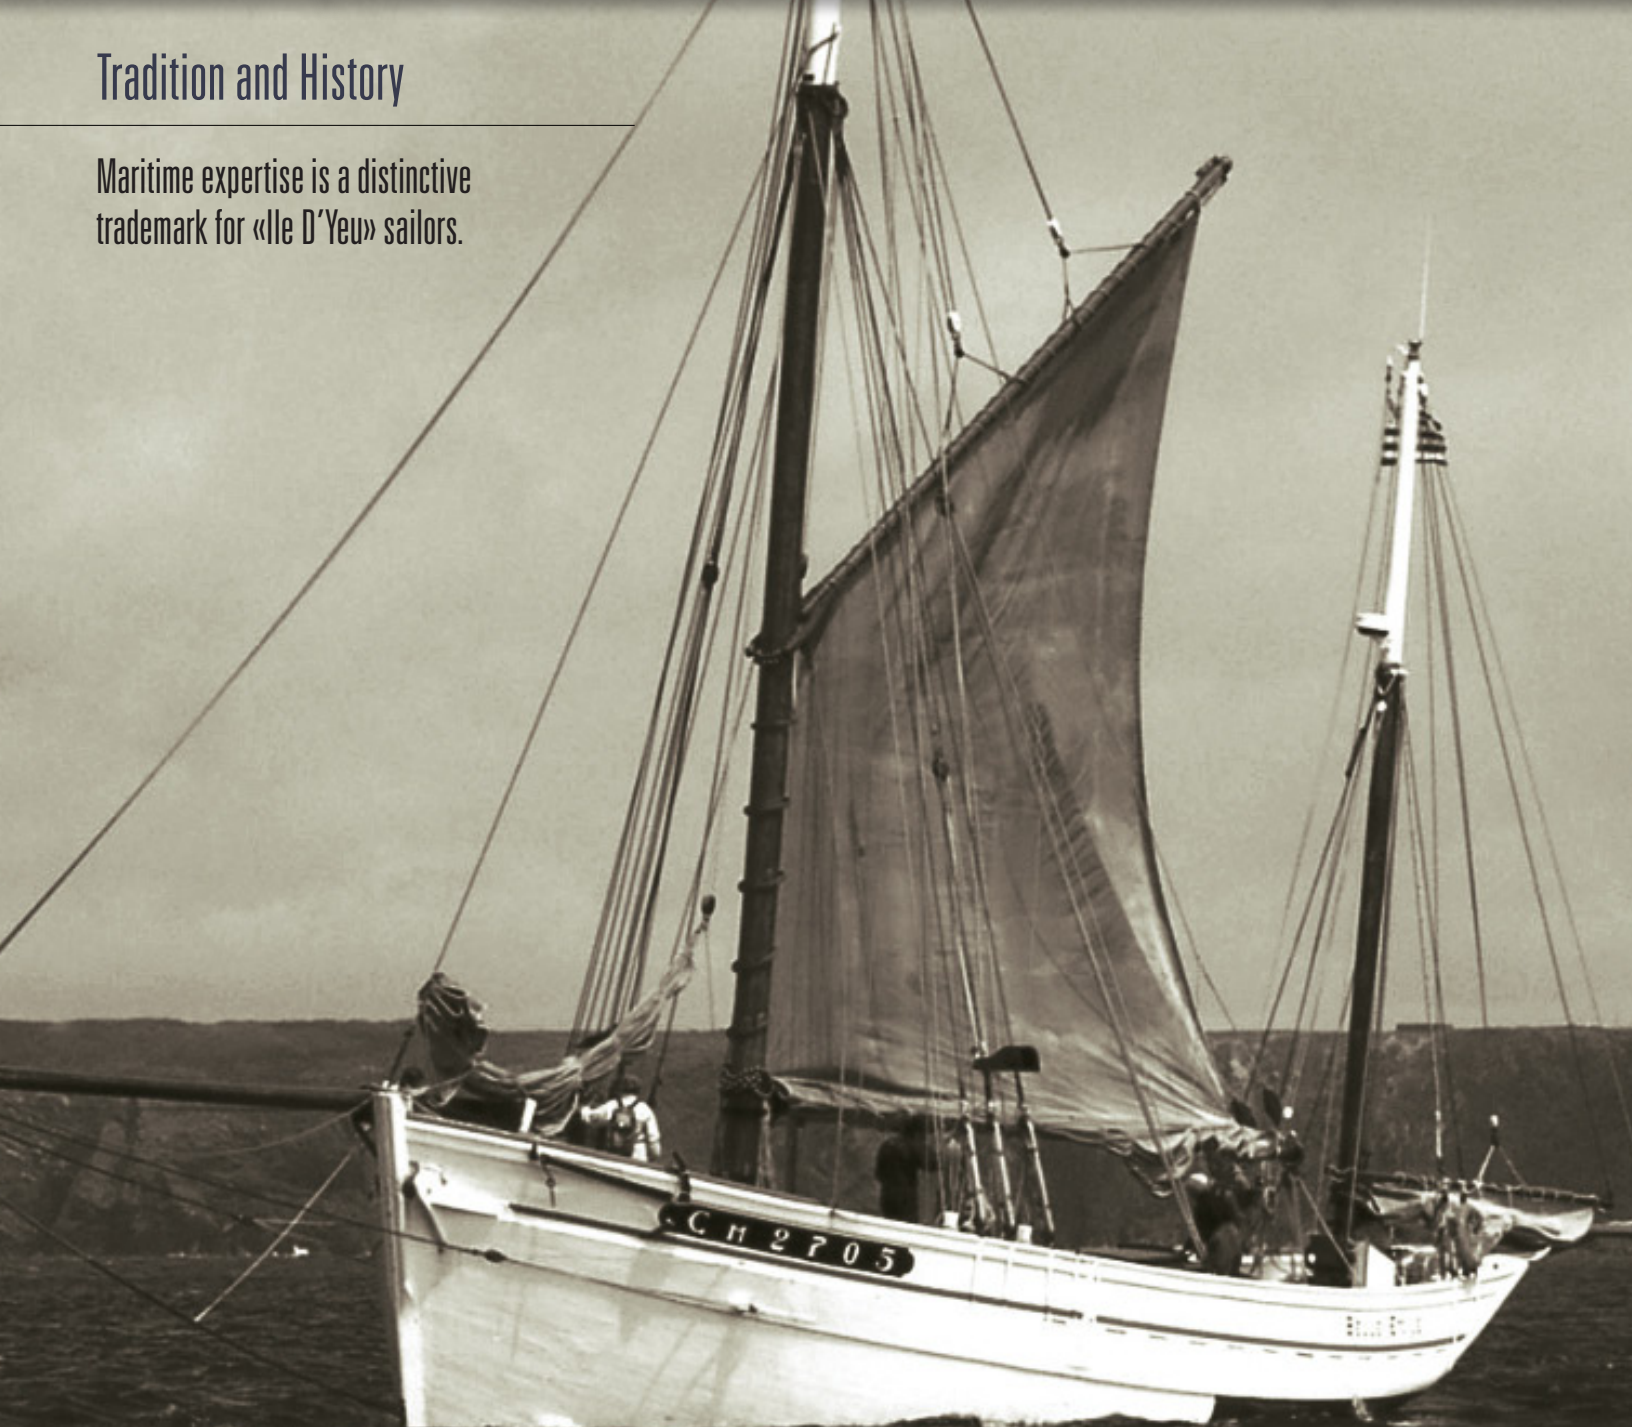

The Canada Pier can be ideal for such needs, protecting from dominant winds and high waves. Due to the heliport for helicopter and the pilots expertise in such conditions, priority repairs could be performed in optimal conditions of efficiency and rapidity.

Tradition and History

Maritime expertise is a distinctive trademark for «Ile D'Yeu» sailors.

Profound values

Committed to preserve the environment and promote clean solutions is a traceable commitment since 30 years (for our population and her elected representatives);

Historical and actual knowledge of navigating in the Atlantic

Ocean, our sailors did not hesitate to navigate to reach Canadian coasts of Newfoundland for tracking in fishing waters;

Historical presence of «life savers» who devoted themselves in perilous interventions

Security: Other important factor

Due to our location, all costly equipment stored is secured (as we are far enough from the coasts and close enough to the wind mills).

This aspect could provide lower risk for insurance companies. Any coastal storage on the continent creates difficulties to identify suspect truck movements and facilitate the planning to be undetected.

Quality of life all year-round

When it comes to attract qualified individuals, the life style on Ile d'Yeu is anything but isolated and that is due to the fast and frequent connections with the continent:

- Pure and Unpolluted Air (sea);
- Numerous Beaches;
- Shops and Restaurants;
- Medical and Dental Service (6 doctors and 2 dentists for 5,000 inhabitants per year);
- The Environment highly protected;
- Frequent fairy rides.

Installation, Training, Maintenance

Since the equipment is located on Ile D'Yeu unlike its location on the continent, it is better secured and surveilled;

- The population's reception of the project;
- The personnel expertise of a workforce that is active in navigation;
- The "School Of The Sea" on Ile D'Yeu is ready to form a team of qualified staff to be trained according to the maintenance requirements.

We're ready !

L'ÎLE D'YEU

A rich and colorful place, with the wind in our sails... We're welcoming tomorrow's energy.
